Subject: Naval Surface Warfare Center (NSWC)
Revised Internal Draft Interim Measures Work Plan (IMWP) for
Solid Waste Management Unit (SWMU) 13 (Mine Fill B)

Dear Mr. Hickey:

On June 12, 2006, Tetra Tech NUS, Inc. (Tetra Tech) submitted an internal draft IMWP for SWMU 13. Since the June 2006 IMWP, additional sampling was performed at SWMU 13 to further delineate polychlorinated biphenyl (PCB) contamination in soils and sediments.

The enclosed revised internal draft SWMU 13 IMWP updates include the following:

- Revised PCB contamination delineation including removal volume estimates
- Adding text for Option 1, which is the additional subsurface soil removal when PCB concentrations are greater than 25 milligrams per kilogram (mg/kg) [i.e., greater than 25 parts per million (ppm)]
- Adding text for Option 2, which is the additional subsurface soil removal when PCB concentrations are greater than 1 mg/kg (i.e., greater than 1 ppm)

The February 2007 version of the SWMU 13 IMWP replaces the June 2006 version of the document. To eliminate confusion, please destroy the June 2006 version of the SWMU 13 IMWP.

The Cost Estimate for the updated internal draft SWMU 13 IMWP is also included.
